Welcome to Big Money Online, the eBook that contains six easy, foolproof methods for generating huge revenue streams over the internet. In this book, I will provide step-by-step instructions on how to put these money making techniques to work for you, so you can literally start earning money online in as little as 10 minutes after you read this.

Hopefully you are excited to start amassing your fortune online – this enthusiasm will serve you well. While the methods I describe in this guide are easy and straightforward, and generally require very little effort, also know that the more effort you do put in, the more money you will make. It's that simple. Of course, if

you're short on time, this guide will also introduce you to some techniques that require only a one-time setup and a few minutes of maintenance per week. The wonderful thing about earning your living online is that the internet is a 24-hour a day, 365 day a year business, so your bank account will continue to grow even when you're away from your computer, taking care of the things that are truly important in your life. Who wouldn't love having more free time?

As I have stated before, this is the most honest, straightforward guide to money making that you will find anywhere. I have sifted through the crap and filtered it out just for you, so you are left with only the most reliable and proven money making methods. Gone are the days of reading through those other eBooks that look like they were written by a 12 year old and are littered with spelling mistakes, dead links, and photos of exotic cars and locations designed to entice you into using their techniques. If you've already downloaded this book, then it's obvious that you are eager to get going and don't need any further encouragement. Luckily for you, there are many excellent avenues for making money online, and part of the reason why they can be so lucrative is because people are wary of scams, "schemes", and the dreaded "systems" offered on a lot of other sites, so they don't give it a try. The beauty of this guide is that it offers ways of earning a lot of money with very small start-up fees, so there is virtually no risk to you. In fact, some of the methods are completely free to get going.

Understand that I am not embellishing when I say that I am handing you your financial freedom on a silver platter. You can use the techniques I offer you to supplement your income so you have more spending cash, or you can do this as a full time job. So let's get started!

Big Money Method #1 eBay and Wholesale

I hate to use an old cliché, but unless you've been living under a rock for more than a decade, you've heard of the auction site eBay. Chances are, you might have also heard of people making their livings by selling products on that site as a full time job (without putting in the full time hours!). If you've ever actually bought something from eBay, you might wonder how it is possible for people to make so much money when items are constantly being sold at such low prices. The answer is simple: wholesale. The sellers making serious cash on eBay utilize wholesale suppliers to buy products in bulk for much, much cheaper than their retail value and re-sell them on eBay for a huge profit. Thousands of people are doing this with great success, and the only thing stopping everyone else is simply the lack of information regarding the suppliers. There is an almost secretive site on the internet with a huge database of wholesalers, liquidators, drop shippers, and manufacturers known as SaleHoo.

SaleHoo is hands down the best site on the web when it comes to finding wholesale goods. The beauty of SaleHoo, besides its expansive database of suppliers, is their ability to ship goods directly to your customers. This saves you the time and cost of packaging and shipping the items yourself, saves you the space of having to store the items in your house, and also guarantees that the items will arrive even sooner to their destination, leaving your customers happy and wanting to do business with you again.

All sites listed in the SaleHoo database are pre-screened and approved to be 100% safe and legit, so you know you're dealing with honest companies whom have a solid reputation amongst the internet selling community. SaleHoo comes with a great set of research tools and amazing customer support to make sure you will

be up and running with ease and the smoothest transactions possible, and stocks literally any type of product you could ever dream of selling.

[CLICK HERE TO LEARN MORE ABOUT SALEHOO AND SIGN UP THROUGH THIS SPECIAL OFFER](#)

Once you're set up with SaleHoo, you're ready to start making bank by listing items for sale on eBay. You could sell items that interest you, something that you know a lot about because it is related to a hobby of yours, etc. However, if you're looking to maximize profits like I was, take a look at a program called Auction Inspector. This program has worked wonders for me by offering a multitude of search options for eBay, scouring it's "Wanted Now" section to find exactly what products are in high demand. Not only that, but out of these items with high demand, it can tell you specifically which ones are in low supply on eBay. This program literally does the hard work for you, tells you exactly which products people are clamoring for, and then you just use your membership at SaleHoo to start offering these products and watch as your auctions and profits go through the roof.

[CLICK HERE TO DOWNLOAD AUCTION INSPECTOR AND BECOME AN EBAY POWERSELLER IN NO TIME](#)

In addition to setting up your own eBay store, you can also bring in even more money by helping eBay as an affiliate by spreading word of items for sale on their site. This is beneficial to you for two reasons – the first is that you will be making easy money by directing traffic to eBay, and the second ties right in with that, because the more people there are browsing eBay, the more people there are that will see and purchase the items you have for sale. It is truly a win-win situation, and that is what makes it such a popular program.

In the interest of making this the best guide possible, I am going to go one step further in depth and tell you exactly how to make this Affiliate Program work for you to its fullest potential. Rather than just blindly directing people to eBay, instead decide on a specific “niche” to focus on. This can be anything you want, the point is simply to narrow it down so you can concentrate on promoting and selling to a specific demographic of customers. For example, you can make your niche videogames, movies, baseball cards, RC cars, model trains, or anything else you can think of.

Once you have decided on your niche product, the best way to promote and advertise what you have to offer is by creating a website (this is described in further detail in Big Money Method #2 of this eBook). On this site, you can link to auctions that are ending soon so people can access them directly from your site, and because of your affiliate status with eBay you can enjoy your share of the revenue. But wait, creating a website can be time consuming, which goes against the entire point of this guide. No worries, NicheStore can take care of the whole process for you in a matter of minutes. You just tell them the niche you’re focused on and they will take care of the rest, setting up your entire website for you the way you want it to look. It is a terrific program in terms of ease of use and in terms of the results it offers.

Big Money Method #2 Making a Website

This method is pretty self explanatory, and was touched on briefly in the previous chapter. The internet has been booming for years, but some people are still wary about getting in on the action. When I talk to these people, they always tell me that they would love to set up a webpage, but they are afraid it is too difficult. In the past, this used to be the case, but now there are sites that basically hold your hand through the entire process, making it easy and painless to set up your own personal space on the web. Millions of people have set up their own pages, and every single one starts with the first necessary step: registering a domain name (for example, YourName.com). HostGator, an award winning hosting company, is the best value for your money when it comes to doing this. They have the most features, most domain names, and they'll have you set up in minutes so you can move on to next step in bringing your site to fruition.

[CLICK HERE TO SET UP YOUR OWN “.COM” DOMAIN WITH HOSTGATOR](#)

Now that you have your domain and hosting set up, it's time to build your site. I won't go in depth in this guide, because there are 500 pages tomes written specifically on this subject, and it would not be practical to cover all of that information here. Instead, check out WebPlus ([CLICK HERE](#)) or NVU ([CLICK HERE](#)) if you're looking for a website building program that is easy to use. Both are great pieces of software for getting the results you're looking for. Once you decide on what you're trying to accomplish with your site – maybe you want to sell crafts you've made, or maybe you have a web comic you want people to read, or even a journal or some pieces of your writing – whatever it is, once you've got it made you will want two things: 1. you want traffic

coming to your site so people will see what you have to offer, and 2. you want your site to start generating money for you. Both of these goals are best accomplished through the use of advertisements. Ads on other sites will direct people to your page, while ads on your page will earn you money when people visit your page.

Google AdWords are a very popular method of advertising and have worked well for many people. The problem with these ads, however, is that they can be very costly to you, as you are essentially paying an exponential fee that grows as your incoming traffic from the ads does. Luckily, there is a great solution from Web Business Secrets that provides you with a lifetime of free Google Ads, as well as ads from Yahoo and other popular search engines. Your traffic will increase tenfold and your ad revenue will skyrocket thanks to your site always being prominently featured as on search results for thousands of search queries on the most popularly used search engines on the web!

[CLICK HERE TO LEARN HOW TO GET GOOGLE SEARCH ADS FOR FREE](#)

Another method of advertising your site is with opt-in emails. Not to be confused with spam, opt-in emails are sent only to people who have requested to be added to a list of subscribers wanting information on websites of a certain niche. So, for example, if you have a music site you are looking to advertise, the Blast Your Ad service will send a personalized email to every one on their huge list of subscribers, encouraging them to visit your website. This is a great way to reach a large audience in a much more personal manner than website ads, but rather than being used as an alternative, they are most effective when using both in combination.

[CLICK HERE TO BLAST YOUR AD AND REACH DOUBLE THE AMOUNT OF NEW VISITORS](#)

Finally, there are programs that literally do all of the work for you. Using their knowledge of how search engine algorithms work when deciding which pages to display as “top results” for a given search, programs like the Search Engine Optimizer can guarantee that your page is the top result for thousands of popular search terms. Huge companies are always the top Google and Yahoo results because their big budget allows them to buy their way to the top of the list, but now you can even level the playing field with this software. I have spoken to a few close friends who have told me their profits have doubled in as little as a month simply because they were getting so much more traffic to their page thanks to topping the list of search results.

[CLICK HERE TO GET THE BEST SEARCH ENGINE OPTIMIZER ON THE WEB](#)

Also, if you’re looking for a method of advertising that will take a bit more work on your behalf, but is more cost effective, don’t forget about the basics, like plain old classified ads that have been doing this trick for decades, even before internet age. The reason classifieds are still relied on to this day, even with all the advances in marketing, is for the simple fact that they are effective. Why mess with proven success?

[CLICK HERE TO GET STARTED ADVERTISING WITH CLASSIFIEDS](#)

Now, if building a website sounds good to you, and you’re anxious to start collecting all that money from advertisers, but for whatever reason you still don’t think you can pull it off – first of all, stop doubting yourself, this is easy and you can do it – and

check out this next method that requires less patience and creativity.

I have stumbled upon a link that will generate 15,000 web pages designed solely to maximize AdSense profits. They are custom designed, all the work is done for you, and they can put \$1500 in your pocket without you ever having to do a thing. I might as well call this a cash machine, because all it does is make you money. I don't want to sound like the old man who always shills the Ronco Grill on TV, but with this method of generating web pages with Google Ads, you literally "set it and forget it" – except when your paycheck arrives.

[CLICK HERE TO ACCESS THE DATABASE OF 15,000 PRE-MADE PAGES FOR USE WITH ADSENSE](#)

Once you're all set up and your website is up and running with the advertising program of your choosing from the methods listed above, you should be generating huge profits. But you could be making even more money. Affiliate programs are how companies like Google made money to begin with on the AdSense and AdWords systems, so why not take that same philosophy and make it work for you? Affiliate Elite is the top affiliate program on the internet and has received some of the most glowing reviews I have ever seen. Make it work for you by following the link below.

Big Money Method #3

Blogging

If you're looking to get in on the ground floor of a booming trend, blogging is for you. Blogging has exploded into the mainstream in recent months, and there is a potential for huge profit.

Everyone from actors, musicians, sports journalists, politicians, and of course average everyday people have taken to creating blogs to spread news and information. The great thing about blogging is its versatility – you can set up a blog to express your opinions, share your thoughts, or share your creativity with the world, or you can simply copy and paste or link to articles, pictures or videos that you find entertaining or interesting enough to share with the rest of the world, and you can make money doing either of these!

Blogger.com ([CLICK HERE](#)) is the best free site to get started when making a blog, and because it is owned by Google, you can very easily put Google Ads on your blog and get paid every time somebody visits it. Setting up a blog on Blogger.com is simple, and it is a breeze to update whenever you want, as often as you want or as infrequently as you want.

Once you set up your blog, you can blog about whatever you want and use any of the methods outlined in Chapter 2 of this guide to go about promoting it and driving in traffic to start making easy cash from Google Ads.

The alternative to this method (or, because of how easy blogging is, you might want to try both) is to use a site that actually pays you to post on your blog. You can make money on every post you make, and they even pay you \$20 just to sign up. It

doesn't get any easier than that. This is without a doubt one of my favorite ways of making money online, because they are paying you to make posts about something you love, or just for copy and pasting interesting news. It's completely up to you which direction you want to take your blog in, but regardless of what you decide, you could be pulling in an extra \$500 a month just by maintaining a basic blog for minutes a day.

[CLICK HERE TO GET PAID TO BLOG](#)

Big Money Method #4 Online Surveys and Data Entry

The next method of online money making I will tell you about is one that has probably been right under your nose for many years. I am referring, of course, to Online Surveys or other forms of Data Entry that pay you good money just for filling out some easy surveys or forms. Unfortunately for the people paying you to do this, many people are skeptical that it might be some sort of scam or false advertising, so there is still a huge, untapped need with a lot of money to be paid out. So, yes, this is unfortunate for them but more importantly it is extremely fortunate for you, because you can reap the rewards! I have compiled a small list of some of the best and most trustworthy of these survey and data entry sites for you to join and start doing exactly what they advertise – get paid big money simply for filling out surveys or entering data that these companies do not have the manpower to do themselves. Outsourcing has been happening a lot lately, and this isn't much different, except you can live anywhere in the world to enjoy the benefits of earning supplementary income in your free time, whenever you feel like it. You can do as few or as many as you like, whatever suits your mood and schedule. I like this method because the amount of money you can make is entirely up to you. Get started making money with surveys and data entry right now at any of these sites:

[1. ONLINE BEST SURVEYS \(CLICK HERE\)](#)

[2. SURVEY SCOUT \(CLICK HERE\)](#)

[3. PAID SURVEYS ONLINE \(CLICK HERE\)](#)

[4. MY DATA TEAM \(CLICK HERE\)](#)

Big Money Method #5 Freelancing

Freelancing has existed for decades and has proved to be the number one way of making money for people who don't want to be tied down to an employer or company and have to live by company rules and work 40 hours a week for a set wage. Freelancing allows writers, designers, photographers and others to work their own hours and earn the amount of money they want without having to answer to anyone. Now, thanks to the internet, becoming a freelancer is easier and more profitable than ever.

Camera Dollars is a website that has been set up to attract freelance photographers by paying them generously for submitting photographs they have taken. The beauty of this is because you will just be uploading your pictures directly to their site, you don't need any expensive equipment like photo paper or special printers. You don't even need a technical knowledge of digital cameras. As long as you can click your finger on the shutter button and click your finger on your mouse button, you can be uploading photos online and getting paid to do so. Camera Dollars offers you a chance to make up to \$250 a day, depending on the number of photos you wish to take, as well as earn a monthly residual income off each and every photo you upload. Over 18,000 people have made money using their site, so I recommend getting in right now while you still can.

[CLICK HERE TO GET PAID TO TAKE PICTURES](#)

Big Money Method #6

Affiliate Marketing

I touched a little bit on affiliate marketing earlier in this guide when discussing how a lot of internet companies generate traffic and sales. Affiliate marketing is essentially the cornerstone of making money online, and it is pretty simple to explain. Websites will pay you to direct traffic to their site, and for every sale they make, they give you a very generous commission. I saved this method for last because it probably takes the most amount of effort out of all the ones I have covered in this guide.

You might say I saved the best for last, though, because with affiliate marketing there is absolutely no limit to the money you can earn, and there are millions of site that offer affiliate programs. In an effort to make these sites easier to find, and to make it easier to become an affiliate of them and start earning money, PayDotCom has set up a great site that explain affiliate marketing in much more detail, and also has an enormous database of companies offering affiliate programs so you can sign up with the click of a button. Additionally, they offer a wide variety of tools to help you start spreading the word of the affiliate you are helping to promote. It is all very simple, as you will see, and only takes a minute to set up. The best part is it is completely free to get started, and you can be making money minutes after you sign up. There is no excuse to not give this a try!

[CLICK HERE TO START MAKING MONEY WITH AFFILIATE PROGRAMS](#)

In Closing...

Thank you for taking the time to read this guide – I hope it has provided you with knowledge you didn't have prior to reading it, and I hope it is the first step on your path to achieving your financial dreams. Congratulations on making the decision to improve your situation in life, whatever that may be. I encourage you to get started right away. Don't wait another minute, get started getting that money rolling in!

If you have any questions, my email is listed on the cover page of this eBook. You can contact me if you wish, I will try to respond to every email, however, I think you will find that this guide is fairly comprehensive and all-inclusive, so you should have all the information you need.

Finally, if you have read this guide and somehow didn't find anything you would like to try your hand at – read it again and rethink your stance, because you would be passing on some amazing opportunities. Good luck building your fortune, and before I leave you, I will leave you with one last gem...
